Inspector Notes:

A nice line of mixed species Awned wheaten/ryegrass hay. Approx 85/15% respectively. Baled with a Krone 8 string baler with bales averaging 700kg+. Did wear 25 mm in the windrow but a good job has been done not to over work this hay and the result is a product still with good green colour at 60%, nice and soft and still has a definite hay aroma. Currently staked outside but should be shedded prior to any rain event.
