Inspector Notes:

Nice line of 2024 season first cut lucerne hay. Baled with a heston 6 string baler with bale weights around 550kg. There are 30 odd grassier bales taken from headlands but easily identifiable and set aside. Beautiful green colour and nice aroma. Is from an irrigated pivot. Well stacked and shedded in a great location to service northern market both feedlot and dairies. Crop was sprayed with Broadstrike.
